Technical Skills

Overview

Programming

soft skills

Curious,Collaborative and De-
ciplined

- **Curious-**
:Inquisitive,exploratory.
- **Collaborative-**:Cooperative,
participative, team-oriented.
- **Deciplined-**
:Focused,motivated,dependable

Bachelor of Science in Software Engineering student at
Addis Ababa Institute of Technology
Expected Graduation Date: June, 2025

- I am a fourth year software engineering student at Addis Ababa Institute of Technology, . A passionate UI/UX Designer that fo-
cuses on user-centered interfaces that drive engagement and busi-
ness growth. Skilled in user research, prototyping, and collaborat-
ing with cross-functional teams to deliver exceptional user experi-
ences.

Experience

march 2024 - **Internship at Shega**
now

- So far,in my internship in shega I have done one project starting
from designing the UI/ux design to developing it using react js.
- Designed and developed a responsive websites, demonstrating my
ability to create visually appealing and engaging web pages.
- I gained valuable experience in Ui/UX , honing my skills in on de-
signing user friendly sites.
- Overall, my internship at Shega provided me with hands-on experi-
ence in ui/ux design and development.Specially,as a ui/ux designer
I have learned the way of developing a design that is user friendly
and includes the proper functionality expected.

July 2023 - **Full Stack Web Developer - E-commerce Website**
oct 2023

- Collaborated with cross functional teams to gather requirements to
build a E-commerce Website that sells clothes.
- Develop the frontend of the website using HTML,bootstrap, Type-
Script, JavaScript, and CSS. This includes building screens for prod-
uct listing, product details, shopping cart, checkout, and user ac-
count management.
- Implement the server-side logic using a backend framework like
nodejs. This involves handling user registration and authentication,
managing product listings and orders, integrating payment gate-
ways, and managing user accounts.
- Establish a connection between the frontend and backend to facil-
itate smooth communication between the client (user) and server,
ensuring seamless interaction and data transfer.
- As a full-stack web developer for the e-commerce website project, I
gained valuable experience in front-end development and backend
development.

Feb 2023 - **Software Developer- Job Finder Application**
Aug 2023

- Developed mobile application which registers both workers and
companies and allows companies to post and close jobs , see the
list of people applied to their job and etc.
- Finding the specific requirements and functionalities needed for
the application, such as user registration, job posting, application
tracking, and job matching.
- Create intuitive and user-friendly interfaces for both workers and
companies to interact with the application.
- Design and set up a database to store user information, job post-
ings, and application data.
- Connect the frontend with the backend to enable seamless commu-
nication between the client and server.
